PRIMARY CARE FOLLOW UP VISIT PROGRESS NOTE

HPI/Chief Complaint:

8/31/2023

Chief Complaint

Patient presents with

- Follow-up Visit
Shoulder pain

HPI:

is a 67 y.o. male, who presents today for a follow-up visit.

The patient had an MRI of the cervical spine on 08/08/2023 ordered by which showed degenerative disc disease.

He continues to experience tightness in his right shoulder, which is improving. He has less cramping and tightening. The patient started aqua therapy approximately 1 month ago, which has been beneficial. The patient also reports that he has continued with acupuncture and other therapies.

Additional Patient Information:

Patient Active Problem List

Diagnosis	Date Noted
• Thoracic segment dysfunction	09/27/2022
• Head region somatic dysfunction	08/26/2022
• Cervical segment dysfunction	08/26/2022
• Somatic dysfunction of sacral region	08/26/2022
• Somatic dysfunction of upper extremities	08/26/2022
• Rib cage region somatic dysfunction	08/26/2022
• Segmental and somatic dysfunction of abdomen and other regions	08/26/2022

Past Medical History:

Diagnosis	Date
• Cancer (HCC)	

No past surgical history on file.

Encounter Date: 08/31/2023

Social History**Socioeconomic History**

- **Marital status:** Divorced

Tobacco Use

- **Smoking status:** Never
- **Smokeless tobacco:** Never

Substance and Sexual Activity

- **Alcohol use:** Never
- **Drug use:** Never

No family history on file.

Allergies: Patient has no known allergies.

Current Outpatient Medications

Medication	Sig	Dispense	Refill
• avanafil 100 mg Oral tab	take 100 mg by mouth.		
• tamsulosin ER (FLOMAX) 0.4 mg Oral extended release capsule	take 0.4 mg by mouth.		

No current facility-administered medications for this visit.

Immunizations /Injections/ Health Maintenance:

Immunizations:	There is no immunization history on file for this patient.
Smoking Cessation:	Robert Walker reports that he has never smoked. He has never used smokeless tobacco. No tobacco cessation counseling needed at this time.

Review of Systems

Constitutional: Negative for chills, fever, malaise/fatigue and weight loss.

HENT: Negative for congestion, ear pain and sore throat.

Eyes: Negative for blurred vision and pain.

Respiratory: Negative for cough, shortness of breath and wheezing.

Cardiovascular: Negative for chest pain, palpitations and leg swelling.

Gastrointestinal: Negative for abdominal pain, constipation, diarrhea, heartburn, nausea and vomiting.

Genitourinary: Negative for dysuria.

Musculoskeletal: Negative for back pain, joint pain, myalgias and neck pain.

Skin: Negative for rash.

Neurological: Negative for dizziness, weakness and headaches.

Endo/Heme/Allergies: Negative for environmental allergies.

Psychiatric/Behavioral: Negative for depression and suicidal ideas. The patient is

not nervous/anxious and does not have insomnia.

Physical Exam:

Vitals:	BP: 108/76 Pulse: 54 SpO2: 99 % Weight: 90.7 kg (200 lb) Height: 180.3 cm (5' 11") Pain Score: 4
BMI:	Estimated body mass index is 27.89 kg/m ² as calculated from the following: Height as of this encounter: 1.803 m (5' 11"). Weight as of this encounter: 90.7 kg (200 lb).
Hearing and Vision:	No results found.

Physical Exam**Constitutional:**

General: He is not in acute distress.

Appearance: He is not diaphoretic.

HENT:

Head: Normocephalic and atraumatic.

Right Ear: External ear normal.

Left Ear: External ear normal.

Mouth/Throat:

Pharynx: No oropharyngeal exudate.

Eyes:

General: No scleral icterus.

Pupils: Pupils are equal, round, and reactive to light.

Neck:

Thyroid: No thyromegaly.

Cardiovascular:

Rate and Rhythm: Normal rate and regular rhythm.

Heart sounds: Normal heart sounds. No murmur heard.

No friction rub. No gallop.

Pulmonary:

Effort: Pulmonary effort is normal. No respiratory distress.

Breath sounds: Normal breath sounds. No wheezing or rales.

Abdominal:

General: Bowel sounds are normal. There is no distension.

Palpations: Abdomen is soft. There is no mass.

Tenderness: There is no abdominal tenderness. There is no guarding or rebound.

Musculoskeletal:

Comments: Full range of motion of bilateral shoulders, 5/5 bilateral upper extremities.

Lymphadenopathy:

Cervical: No cervical adenopathy.

Skin:

General: Skin is warm and dry.

Neurological:

General: No focal deficit present.

Mental Status: He is oriented to person, place, and time.

Cranial Nerves: No cranial nerve deficit.

Psychiatric:

Mood and Affect: Mood and affect normal.

Behavior: Behavior normal.

Thought Content: Thought content normal.

Judgment: Judgment normal.

Head: OA compression.

Cervical: C2 and C3 rotated right.

Thoracic: Thoracic outlet restriction. T2 and T3 rotated left.

Sacrum: Sacral strain.

UE: Bilateral trapezius hypertonicity as well as bilateral clavicle restriction.

Abdomen: Bilateral diaphragm restriction.

Labs:

No results found for: WBC, HEMOGLOBIN, HEMATOCRIT, PLT, CHOL, TRIG, HDL, LDLCALC, ALT, AST, NA, K, CL, CREATININE, BUN, EGFR, EGFRFRAMR, EGFRNONAFR, GFR, CO2, TSH, PSA, INR, GLUCOSE, HGBA1C, MICROALBUR, CREATURINE, CALCIUM, ALKPHOS, BILITOT, BILT, BILIDIR, ALB, PROT

Assessment / Plan:

1. **Chronic right shoulder pain**
2. Muscle hypertonicity
3. Head region somatic dysfunction
4. Cervical segment dysfunction
5. Thoracic segment dysfunction
6. Somatic dysfunction of sacral region
7. Somatic dysfunction of upper extremities
8. Rib cage region somatic dysfunction
9. Segmental and somatic dysfunction of abdomen and other regions

Cervical segment dysfunction

The patient was treated with the following modalities

Articulation

Procedure was tolerated well.

Head region somatic dysfunction

The patient was treated with the following modalities

ME

Procedure was tolerated well.

Rib cage region somatic dysfunction

The patient was treated with the following modalities

Articulation

Procedure was tolerated well.

Segmental and somatic dysfunction of abdomen and other regions

The patient was treated with the following modalities

BLT

Procedure was tolerated well.

Somatic dysfunction of sacral region

The patient was treated with the following modalities

BLT

Procedure was tolerated well.

Somatic dysfunction of upper extremities

The patient was treated with the following modalities

Articulation

ME

Procedure was tolerated well.

Thoracic segment dysfunction

The patient was treated with the following modalities

ME

BLT

Procedure was tolerated well.

Chronic right shoulder pain and muscle hypertonicity:

MRI of cervical spine reviewed with patient. The patient will continue with aqua therapy as well as other modalities such as acupuncture. Generalized improvement of range of motion and pain.

Follow up as needed.

Patient Instructions and Goals:

Pt Instructions:	There are no Patient Instructions on file for this visit.
Follow-Up:	No follow-ups on file.

I, [REDACTED] DO, attest that I provided the services within this note utilizing voice recognition technologies, my voice was used to document portions herein. I have reviewed all the information within and have made modifications where necessary to ensure documentation accuracy.
